V1.2

Powered by

Gemserv

Your subscription service for latest insights, compliance and guidance on the transition to electric vehicles.

The global economy is phasing out fossil fuels and transitioning to **Electric Vehicles**, not because it is easy but because climate change poses an existential threat to us all.

The transition is challenging business models and cross sector working. This poses significant levels of financial risk, but also opportunity.

**Paladin** is here to help to facilitate the switch to EVs providing easy access to insights, compliance and guidance relevant to your business, products and services.

**Gemserv** has teamed up with **Alyne** to help government, public and private organisations, green investors and consumers to gain actionable insights and strengthen their governance, risk and compliance capabilities as we transition to electric vehicles.

**Paladin** is a digital subscription service brought to you by **Gemserv**.

# PALADIN v1.2
